WEST BRATTLEBORO.
The following article which was published
in the West Brattleboro correspondence of
The Phoenix in 1875 was received recently
from a subscriber who lives in Nebraska:
"The Magazine club of this village has been
reorganized for the year 1875. The announce-
ment itself may possess no general interest.
We make it for the purpose of recommending
similar organizations to other people in vil-
lages and communities. Our club has been
in existence three or four years. We like it—
everybody likes it. It is a club that our
Nebraska friend is trying to aid the Magazine
club to fix more definitely the date of its
organization, which has been continuous since
that time."

A serious situation exists in the Bal-

armies in anticipation of hostilities
with Turkey. Turkey has called a por-

Roumania alone holds a peaceful atti-

with Greece against Turkey is very
significant. Turkey is supposed to have
sued for peace with Italy and negotia-
tions were in progress when this trou-
ble developed.

Potatoes are still selling at a fairly
high price, about 90 cents per bushel,
but a big drop is expected when the
crop is fully harvested, as the yield for
the whole country is estimated at 78
million bushels above the ten year av-
erage, and 100,000,000 bushels more than
in 1911. The average price of potatoes
now, taking in the whole country, is es-
timated at 65 cents, against an average
of \$1.14 last year. The average import
price last winter, when large quantities
of potatoes were brought from abroad,
was 52 cents.

Lieut. Lewis C. Rockwell and Corporal
Frank S. Scott of the aviation corps of
the United States army, were killed at
College Park, Md., Saturday by a fall of
35 feet in an aeroplane. They had been
in the air eight minutes at a height of
about 500 feet, and after gliding toward
the earth started to turn upward again,
when the machine buckled. Both men
were thrown clear of the wreckage.
Scott was killed instantly and Rockwell
died in a short time without recovering
consciousness. On the same day John
L. Longstaff, a former English army of-
ficer, was fatally injured at Hempstead,
Long Island. He was at a height of 70
feet when a wire connecting the control
of his biplane became jammed and the
aeroplane turned completely over. The
machine struck the earth with great
force and Longstaff was buried in the
wreck. He was taken out suffering
from a fractured skull and internal in-
juries and lived but a short time. Pierre
Chavellier, who accompanied him, was
thrown clear of the machine. He is se-
verely injured, but will probably recov-
er. He will lose the sight of one eye.
